Art Unit: 1745

1. Applicant's election with traverse of Group I in Paper No. 8 is acknowledged. The traversal is on the grounds that there is no serious burden on the examiner to examine all of the recited groups and that the inventions are not independent or distinct. This is not found persuasive because each of the four groups outlined in the February 28, 2003 restriction requirement are classified in different subclasses and so there would be serious burden on the examiner to search all of these subclasses. Also, each of the four groups are distinct from one another because of the reasons set forth in the above requirement and do not bear repeating because the reasons are set forth therein.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Ferraro et al.

(Ferraro)

Reference is made to paragraph 8 of Ferraro along with paragraph 17 and Figures 1-6, with particular note to Figures 1 and 6. In these portions of Ferraro, the claimed thickness of less than 0.18 mm for the lower part of the can is shown and the thickness of the sealing portion of the can in Ferraro being of a value 1.4 times the thickness of the lower part of the can is also taught.

Art Unit: 1745

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sealing portion of the can that is 1.4 times the thickness of the lower part of the can must be shown or the features canceled from the claim. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

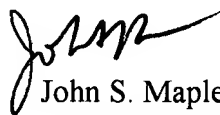

5. Figures 15-17 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday from 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 703-308-2383.
